SUMMARY

Front-end developer with hands-on experience building responsive, interactive web applications using JavaScript, HTML, and CSS. Built 10 projects, including a Chrome extension and a construction batching tool for civil engineering use. Currently progressing toward full-stack development.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Concepts: Responsive Web Design, Mobile-First Design, Flexbox, Semantic HTML, DOM Manipulation, Event Handling

Tools & APIs: Git, GitHub, Chrome Extension API, Local Storage API, REST APIs

PROJECTS

Lead Tracker Chrome Extension | *JavaScript, HTML/CSS, Chrome Extension API* GitHub

- Built a Chrome extension that lets users save and manage leads directly from the browser.
- Used the Local Storage API to keep saved leads and active tab URLs available between sessions.

SiteBatch | *JavaScript, HTML/CSS* GitHub | Live Demo

- Built a construction-site batching assistant that tracks concrete mix ratios, bucket counts, and batch progress, with common civil engineering calculations.

Color Scheme Generator | *JavaScript, REST API* GitHub | Live Demo

- Built a color scheme generator using the Color API, with HEX code copying and light/dark mode.

El Clásico Scoreboard | *JavaScript, DOM Manipulation* GitHub

- Built an interactive Real Madrid vs. Barcelona scoreboard that updates scores and the interface through event listeners.

Blackjack Game | *JavaScript* GitHub

- Implemented card dealing, score calculation, and win/lose logic with state management for a browser-based card game.

Password Generator | *JavaScript* GitHub

- Built a utility that generates random passwords and copies them to the clipboard in one click.

Unit Converter | *JavaScript* GitHub

- Created a tool that converts length, volume, and mass, updating results instantly from user input using reusable JavaScript functions.

Hometown Homepage & Learning Journal | *HTML5, CSS3, Flexbox* Homepage | Journal

- Designed mobile-first pages with Flexbox and semantic HTML that display well on different screen sizes.

Car Counter | *JavaScript* GitHub

- Built a counter app that tracks and displays incremental counts using DOM updates.

EDUCATION

B.Eng. Civil Engineering, Kwara State University (KWASU) *Expected 2028*

COURSES & CERTIFICATES (SCRIMBA)

Learn JavaScript (9.4 hrs, 238 lessons) *August 2026*

Learn Git and GitHub (1.7 hrs, 40 lessons) *August 2026*

Learn HTML and CSS (5.7 hrs, 121 lessons) *March 2026*
